

View, access, and collaborate on a wide variety of complex document types, including CAD files and associated formats from any device.

Enable Fast Collaboration for Onsite Workers

Provide real-time access to projects from any device, so onsite workers can view, annotate and edit documents on web, mobile, or desktop — without servers or other external dependencies.

Access Complex File Formats from Anywhere

Standardize viewing and collaboration on PDF, CAD, autoCAD, MS Office image format files, and more, across all major platforms, from any device or location.

Secure Review Processes — No Added Software

Securely view all of your engineering content from any device, without the need for additional licenses or software — all while embedding the necessary security features to maintain ongoing regulatory compliance.

Key Features:

Over 50+ file formats

Real-time collaboration

Built-in security features

Integrate with existing software

Automate Workflows

Compare PDF/CAD/ Image Files
