ARender for Banking

Streamline loan process management

Quickly and effectively manage loan process workflows against growing customer demand, all while maintaining corporate compliance and safeguarding PII.

Accelerate Completeness Reviews

Quickly access, read, and flag or annotate documents from a single interface to streamline client exchanges and third-party reviews.

Decrease Response Times

Share, access, annotate, and index all relevant information from a single interface and automate review workflows.

Achieve Ongoing Compliance

Quickly and securely exchange information with external auditors while securing PII at all times, thanks to automated redaction.

Key figures :

Over 50+ File Formats

Convert client IDs, insurance forms, expert reports, and more.

Real-time Collaboration

User markups appear in real-time while preserving the original file.

Built-in Security Features

Easily configure user permissions, redact PII, and enable audit trails

Integrate With Existing Systems

Integrate directly with your existing ECM software and workflows.

Automate Workflows

Streamline contracts, compliance workflows, and third-party signatures.

Manipulate Documents

Split packets of documents into separate parts for reuse later.
